EDUCATION

Lakehead University

Bachelor in Software Engineering & Diploma in Software Engineering Technology

Thunder Bay, ON

Graduated April 2026

- **Average:** 90% — **GPA:** 4.0
- **President's List:** 2023, 2024, 2025
- **Dean's Scholar Award:** Software Engineering

EXPERIENCE

AI Agent Architecture Design Intern

May 2026 - Present

Booky

Thunder Bay, ON

- Recognized that human customer support workload was high for a complex platform; designed and curated structured knowledge bases optimized for Vector Searches to ensure accurate, retrievable information for AI agents
- Developed a Retrieval-Augmented Generation (RAG) AI support agent using AWS Bedrock and integrated it with internal knowledge repositories to deliver context-aware, automated assistance
- Built a Python Flask proof-of-concept application to validate agent functionality and gather stakeholder feedback
- Contributed to the planning of a scalable AI-driven customer support strategy, aimed at reducing manual workload and improving self-service capabilities.

Collaboration Solutions Design Intern

April 2025 - April 2026

Shared Services Canada - Messaging and Enterprise Collaboration Services

Ottawa, ON

- Conducted comparative evaluations of local and cloud-hosted LLMs using ROUGE, BLEU, claim verification, and LLM-as-a-Judge methodologies, providing data-driven recommendations for enterprise AI adoption
- Created Python and LangChain pipelines to automate LLM model evaluation, producing a repeatable framework that reduced manual benchmarking effort
- Co-developed an Azure AI Foundry agent that identifies outdated documentation and generates structured Excel reports to guide revision planning
- Streamlined document verification, improving operational efficiency and supporting data-driven model selection

Research and Development Engineering Intern

April 2024 - March 2025

Shared Services Canada - Contact Center and Conferencing Services

Ottawa, ON

- Developed a conversational AI proof-of-concept using Ollama, Vector databases, LangChain, Flask, and AWS services to evaluate the feasibility of AI-assisted customer support
- Integrated AWS Lambda, EC2, Lex, and SQL databases to support scalable messaging and conversation storage
- Conducted iterative testing with users to improve the chatbot and ensure alignment with operational requirements
- Documented the project end-to-end, enabling knowledge transfer and supporting future development
- Presented demos to stakeholders, helping secure interest in pilot implementation
- **Shared Services Canada Award of Excellence:** Student Leadership 2024

PROJECTS

Multichannel Messenger System | Python, HTML/CSS/Javascript, Flask-SocketIO

January-April 2025

Real-Time Secure Web-Based Messaging Platform

Team Lead

- Led development of a real-time messaging platform with encrypted messaging, user auth, and persistent chats
- Implemented AES-encrypted messaging, image sharing, notifications, and friend-management functionality
- Coordinated integration across frontend, backend, and database components within a team environment

Audio Transmission System | Python, Flask, RSA, AES

October-November 2024

Secure & Encrypted Voice File Communication Project

- Developed a secure client-server platform for audio-file transmission using RSA authentication and AES encryption
- Implemented compression techniques to improve transmission efficiency while maintaining audio quality
- Delivered a secure communication solution meeting authentication, confidentiality, and performance requirements

TECHNICAL SKILLS

Languages: Java, C++, Python, MySQL

Frameworks: Tensorflow, Keras, OpenCV, JavaFX, Flask, Langchain

Developer Tools: GitHub, Visual Studio, Eclipse, Google Colab, Jira, Power Automate, AWS, Azure, AI Foundry

Software Development Concepts: Data Structures, Object-Oriented Design & Debugging, Software Development Life Cycle, Machine Learning, Generative AI, Large Language Models, Computer Communications, Natural Language Processing, CI/CD, Agile, Database Management, Cloud Deployment & Automation, Full Stack Development
